Her Excellency,
The Right Honourable Jeanne Sauvé, P.C., O.C., C.M.M., C.D.,
Governor General of Canada,
Ottawa, Ontario.

Excellency:

As Minister responsible for the administration of the Foreign Investment Review Act, I have the honour to present to your Excellency the Eleventh Annual Report under the Act for the fiscal year ended March 31, 1985.

Respectfully yours,

Sinclair Stevens
Minister of Regional Industrial Expansion

Ottawa, Canada
September 1985

The Honourable Sinclair Stevens, P.C., M.P.,
Minister of Regional Industrial Expansion,
Ottawa, Canada.

Sir:

I have the honour to submit to you, the Minister responsible for the administration of the Foreign Investment Review Act, the Eleventh Annual Report under the Act for the fiscal year ended March 31, 1985.

Respectfully submitted,

Paul Labbé
President
Investment Canada

XX Applicants classified by country of apparent control

XXI New businesses classified by principal industry sector

## Operations under the Act

The Foreign Investment Review Act required the Government of Canada to review two types of foreign investment to ensure significant benefit to Canada: most acquisitions of control by non-Canadians of existing businesses in Canada; and the establishment of new businesses in Canada by non-Canadians who either did not already have a business in Canada or did not have a business to which the new business was or would be related.

### CASELOAD (Table I)

The number of applications received by the Agency decreased to 940 in 1984-85 from 1010 the preceding year. Of that number, 929 were certified as subject to review under the Act. Most of the 929 cases (80 percent) involved the acquisition of assets or the establishment of businesses with planned investments of less than $5 million.

The following sections provide a profile of acquisition and new business cases and a discussion of the benefits to Canada expected from investments that were allowed. Readers can find detailed statistical tables on the cases in Appendix A. (Note: Comparable statistics covering the period April 1, 1985 to June 30, 1985 when the Foreign Investment Review Act was repealed and replaced by the Investment Canada Act are provided in Appendix E.)

Acquisitions (Tables II to IX)

The number of reviewable acquisition cases increased in 1984-85 to 474 from 461 in 1983-84. Of the 474 cases, 54 percent involved the acquisition of business enterprises in Canada which were already foreign-controlled and, 68 percent of the proposals involved the acquisition of businesses with assets of less than $5 million. The total value of assets of businesses being acquired increased to $11.9 billion in 1984-85 from $4.5 billion in 1983-84.

The distribution of cases by industrial sector was similar to that of previous years with over half the cases (54 percent) in the service sector, 40 percent in manufacturing and 6 percent in resources. The provincial distribution of cases was as follows: 61 percent in Ontario; 16 percent in Quebec; 9 percent in British Columbia; and 9 percent in Alberta. The provincial distribution of cases from the United States, Western Europe, and other countries was roughly the same as the provincial distribution of all cases. Most acquisition proposals (71 percent) came from the United States and 23 percent from Western Europe, in particular the United Kingdom (11 percent). The distribution of cases by industrial sector did not vary with the country of origin, the service sector leading, followed by manufacturing and resources.

In 1984-85, 494 acquisition cases were resolved (allowed, disallowed or withdrawn). Of these, 464 were allowed by the Governor in Council, 4 were disallowed, and 26 were withdrawn by the applicants prior to a decision by the Governor in Council.

New businesses (Tables XII to XXI)

The number of reviewable new business proposals decreased from 512 in 1983-84 to 455 in 1984-85. The total value of planned investment in the reviewable new business proposals amounted to $820 million, down from $2.7 billion in 1983-84. Of the 455 reviewable proposals, 93 percent involved planned investments of less than $5 million. Seven cases alone accounted for 42 percent of the total value of planned investment.

Seventy-two percent of the cases concerned the establishment of new businesses in the service sector, 25 percent in manufacturing, and 3 percent in resources. The manufacturing sector (46 percent) led in terms of the value of planned investment, followed closely by services (42 percent). Ontario's share of the number of proposals was 63 percent, Quebec's 14 percent, British Columbia's 8 percent, Alberta's 7 percent and Manitoba's 3 percent. The provincial distribution of the number of cases varied slightly with the country of origin. U.S. applicants favoured the western provinces (23%) and Ontario (68%), whereas Western European applicants favoured the Quebec (28%) after Ontario (53%).

The distribution of cases by country of origin was 59 percent from the United States, 30 percent from Western Europe, including the United Kingdom, and 11 percent from other countries.

The number of resolved new business cases increased from 493 in 1983-84 to 507 in 1984-85. Of the 507 resolved cases, 474 were allowed and 6 disallowed by the Governor in Council and 27 were withdrawn by applicants prior to a decision by the Governor in Council.

Significant benefit

All investments which, in the judgement of the Government, offered significant benefit to Canada according to the factors set out in subsection 2(2) of the Act, were allowed. Briefly, the factors concern the impact of a proposal on the economy in terms of employment, use of parts and services produced in Canada, and on exports, the impact on Canadian participation, on industrial efficiency and technological development, and on competition, and the compatibility of a proposal with enunciated national and provincial economic and industrial policies. The weight given to each of the factors relevant to a particular case necessarily varied according to the nature of the proposal, the sector in which the investment was to occur, the region in which it was to be made, the kinds of undertaking, if any, offered by the applicant, and other factors and circumstances unique to each case.

Planned new investment and employment were about the only readily quantifiable benefits associated with foreign investment proposals under the Act. Though great care must be taken in using or interpreting these figures -- one large case during a year can distort the figures just as the absence of such a case

can from one year to the next -- they do provide some measure of the benefits likely to result from investments allowed under the Act.

Comparison of planned new investment and planned employment
identified in plans/undertakings of allowed cases

OPINIONS

Two types of opinion were provided to foreign investors on request: first, subsection 4(1) of the Act authorized the Minister to give opinions as to whether or not an investor was a "non-eligible person" (i.e. non-Canadian), and as to whether or not the activities of a new or acquired business were, or would be, related to the activities of a non-eligible person's existing business in Canada; second, to assist investors and their legal counsel the Agency gave its own opinions, under certain circumstances, on whether or not a proposed or actual investment was reviewable under the Act. Ministerial opinions were formally binding on the Minister for a period of two years, provided that all material facts were disclosed at the time the application was made and that these facts remained substantially unchanged. Agency opinions were not binding on the Minister.

In 1984-85, twenty ministerial opinions were given and the Agency provided 140 formal opinions to foreign investors and legal counsel on how the Act applied or did not apply to their projected investments.

SURVEILLANCE

The Foreign Investment Review Act empowered the Minister to require that a notice in the prescribed form be filed when a non-eligible person proposed to make or had made an investment which was subject to review and had failed to file notice.

In 1984-85, numerous reports from the news media and unsolicited information from individuals and companies resulted in 168 detailed investigations concerning proposed or actual acquisitions or Canadian business enterprises or the establishment of new businesses in Canada, where no notice had been filed. These investigations led directly to the filing of 71 acquisition and new-business notices.

## ENFORCEMENT

All cases decided under the Act are followed up to ensure that investors are meeting the terms and conditions of their allowance, or in disallowed cases, to ensure that investors are not proceeding with the investment contrary to the Governor in Council decision. In 1984-85, in accordance with established procedures, the Enforcement Division monitored the implementation of plans and undertakings provided by investors in 2,205 proposals that had been allowed. In addition, 12 disallowed cases were monitored to ensure compliance with the decision of the Governor in Council.

## LEGAL PROCEEDINGS

The Foreign Investment Review Act authorized the Minister to initiate legal proceedings in any case where the investor failed to file notice as required by the Act, or failed to meet the terms and conditions of his investment as set out in his investment notice or in the plans and undertakings connected with it, or failed to comply with an order of disallowance.

Ambassador Bridge

Central Cartage Company and the Detroit International Bridge Company (DIBC), owners of the Ambassador Bridge linking Windsor and Detroit, commenced proceedings in the United States District Court in Michigan against the Crown, various ministers and officials and past officials of FIRA for alleged losses arising out of the Government's disallowance of the acquisition of control by the plaintiffs of the Canadian side of the bridge. The Attorney General commenced proceedings on November 26, 1982 under the Act for an Order rendering the investment by DIBC nugatory. The proceedings in the U.S. courts were dismissed as being premature in light of the Crown's application in Canada for a nugatory Order. A trial date for the Crown's action has not been set.

ADMINISTRATION

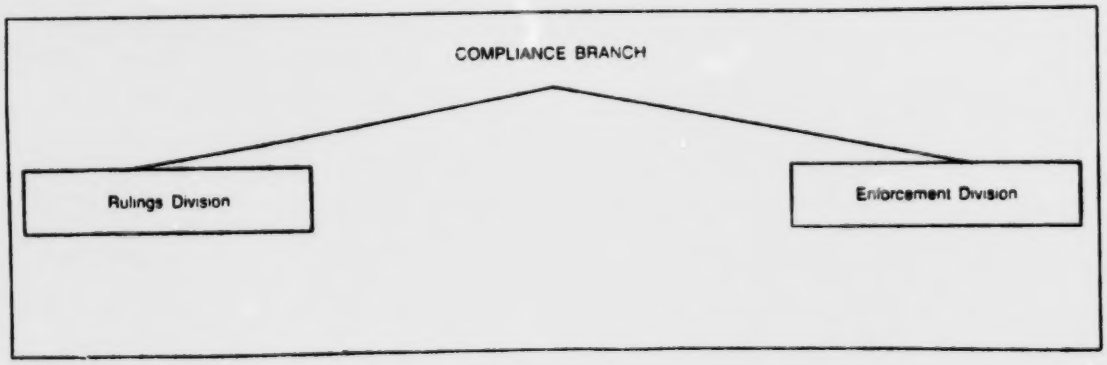
For fiscal year 1984-85, the Agency was assigned a budgetary allotment of $6,965,000 and 136 person-years. The actual expenditures were $6,778,612.41 and 132 person-years were utilized. During the year, administrative activities continued to be carried out in accordance with the policies and procedures of the Treasury Board and the Public Service Commission. Efforts were continued to meet the requirements of the Official Languages Act. An Affirmative Action Plan was approved during 1984-85; information was provided to all employees to make them aware of and understand the objectives of the program.

## Organization of the Agency

The Foreign Investment Review Agency, whose sole responsibility was to advise and assist the Minister responsible for the administration of the Act, had three operational units: Compliance Branch, Assessment Bureau and Policy, Research and Communications Branch. Their functions and responsibilities are described below. All units of the Agency were supported by the Personnel and Administration Division, which reported directly to the Commissioner. Legal services were provided to the Agency by Department of Justice advisors.

### COMPLIANCE BRANCH

The Compliance Branch was responsible for ensuring that the legal requirements of the Act were met.



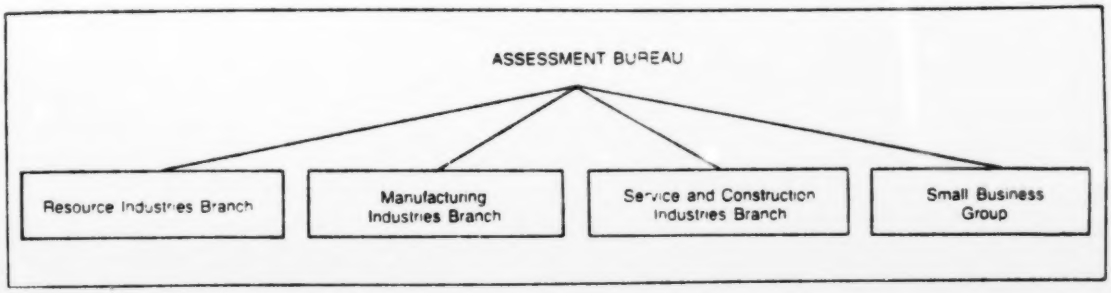
The Rulings Division received and verified notices from investors who submited their investment proposals for review under the Act. It provided informal advice to investors, their counsel and Agency officials on the applicability

of the Act and assisted the Minister in discharging his statutory responsibility for issuing formal opinions on the eligibility status of applicants and on whether or not the proposed new business activities were related to existing activities of a business.

The Enforcement Division carried out a program of surveillance to identify reviewable transactions for which notices had not been filed and ensured that they were submitted for review under the Act. It regularly monitored the implementation of plans and undertakings offered by investors whose applications have been allowed. It also ensured that investors whose proposals have been disallowed by the Governor in Council complied with the orders of disallowance within a reasonable period of time. This may involve making sure that new businesses which may have already been established cease operating; causing and monitoring the divestiture of an acquired Canadian business enterprise; and making certain that investment proposals that were disallowed are not implemented. The Enforcement Division also conducted investigations and inspections, informally or formally under the authority of the Act, into apparent instances of failure to comply with the Act, including implementation of investment proposals without Governor in Council approval, or on terms different from those contained in the proposal. And, it advised the Minister to invoke, when necessary, the remedial provisions of the Act (injunctions, nugatory orders, or orders to comply with undertakings).

ASSESSMENT BUREAU

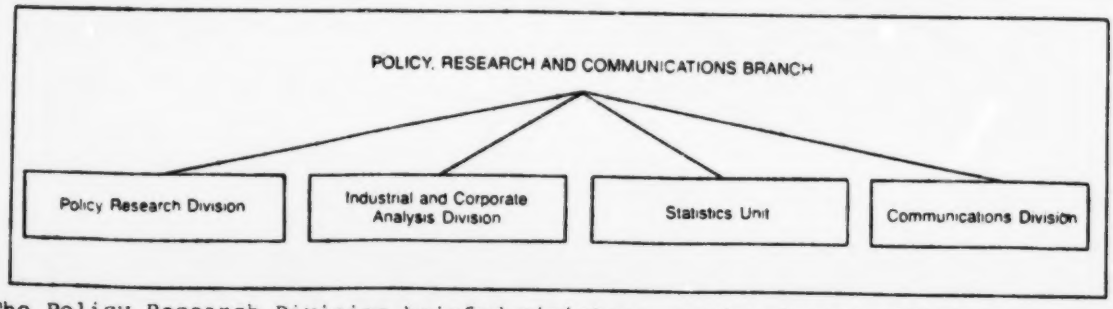
The Assessment Bureau, which was at the heart of the Agency's operations, analysed investment proposals against the factors for the assessment of significant benefit to Canada. It had three branches, each carrying out the same functions in relation to one of the three broad sectors of the economy, namely: Resource Industries; Manufacturing Industries and Construction and Services. In addition, a Small Business Group provided rapid analysis and assessment of small business proposals in the manufacturing and service sectors.



In all four units the analysis was based primarily on information provided by the investor in the notice and information on companies and sectors provided by federal departments and agencies with policy responsibilities and expertise in the industry sectors involved. The Bureau also maintained direct contact with provincial governments in order to determine how investment proposals related to their industrial and economic policy objectives. Following this analysis, the Bureau advised and assisted the Minister in his assessment of the proposals. The sections in this report on the caseload and significant benefits provide further insight into the work of the Assessment Bureau.

POLICY, RESEARCH AND COMMUNICATIONS BRANCH

The Policy, Research and Communications Branch was responsible primarily for research and analysis in support of Agency operations and the development of government policy related to foreign investment. It reviewed results achieved through the administration of the Act and helped to develop new approaches to improve the effectiveness of the program.



The Policy Research Division briefed ministers, senior Agency officials, Canadian businessmen, the international investment community and other interest groups on the many issues related to foreign investment policy of Canada and other industrialized countries. Other functions included responding to questions and enquiries from members of Parliament and senators and from the general public, receiving visitors at the Agency who sought information on the program and the Act, and providing speakers for seminars and engagements on various topics surrounding the issue of foreign investment in Canada. Policy research is the centre of the Division's work, and to this end, it participated in the Interdepartmental Committee on International Investment Policies (which is chaired by the Department of External Affairs and is concerned with a host of international issues, many of which have major implications for foreign investment policy) and participated in the work of

the Committee on International Investment and Multinational Enterprises of the Organization for Economic Cooperation and Development. The Division also carried out a wide range of research projects on various aspects of foreign direct investment, including the behaviour of multinational enterprises and appropriate alternative policy approaches.

The Industrial and Corporate Analysis Division was responsible for advice and analysis on industrial and corporate performance in support of the assessment and enforcement functions of the Agency. Tne Division also undertook special projects relating to operations under the Act.

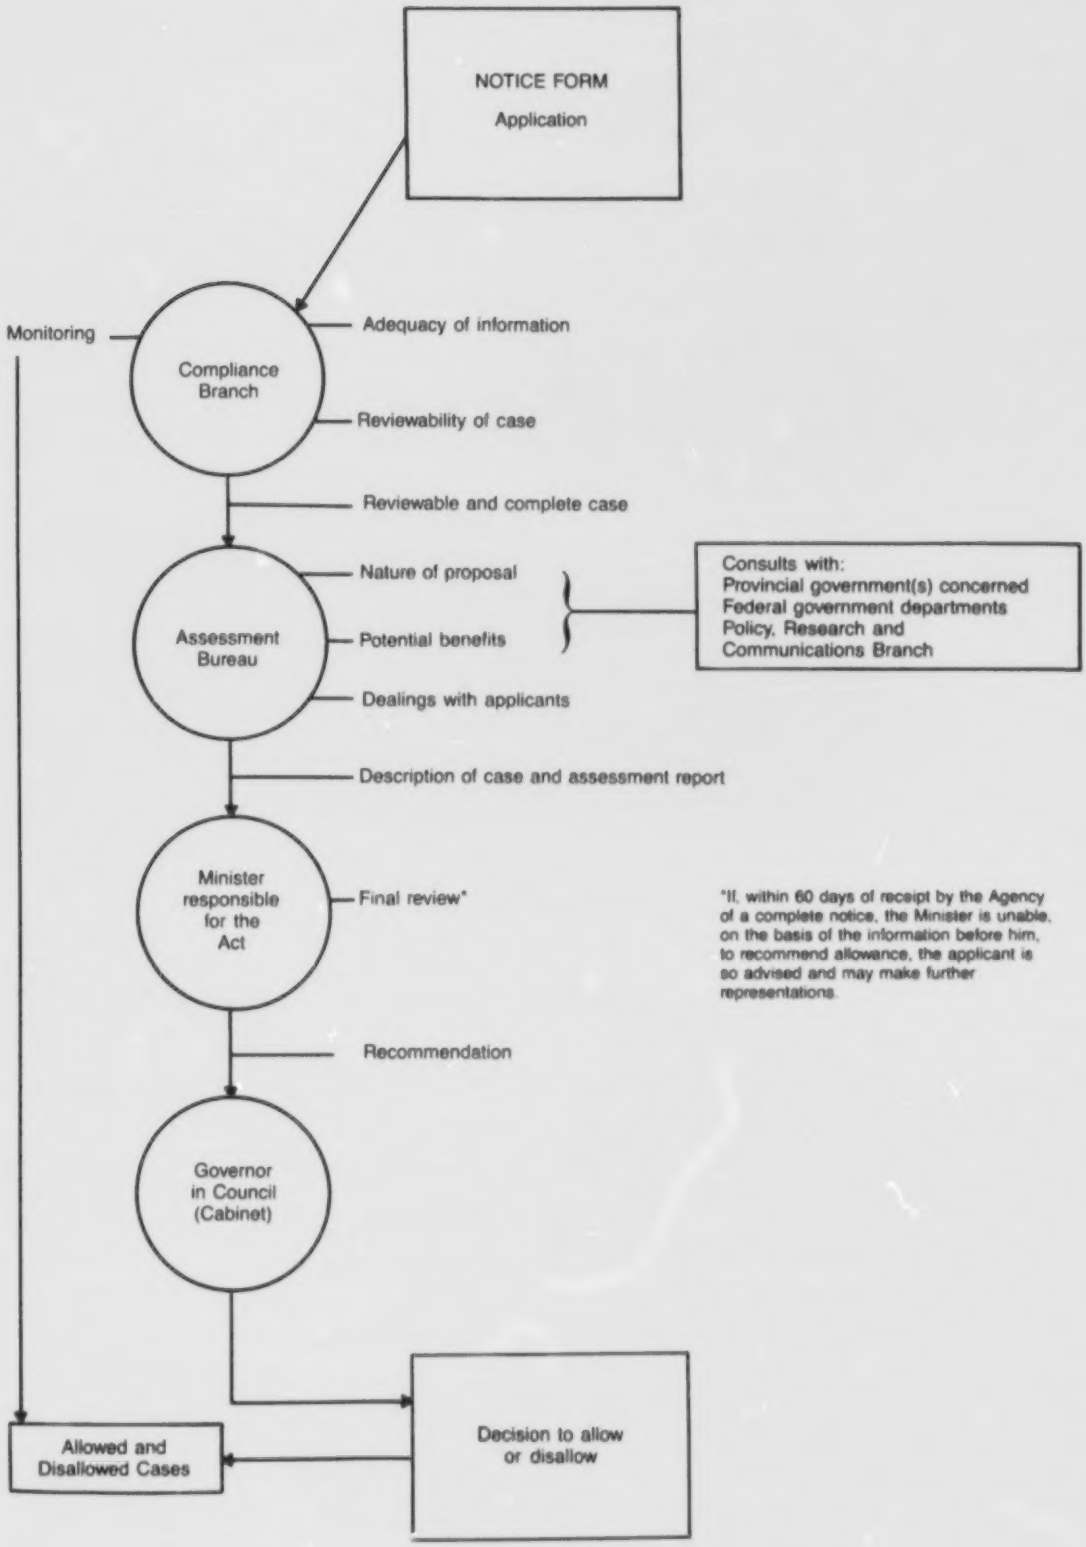
The Statistics Unit compiled and maintained data on investments reviewed and on the review process for purposes of internal management, reporting and research. The unit provided statistical analysis in support of the Agency's information program, including responses to parliamentary and other enquiries.

The Communications Division was responsible for providing general information services including responding to general enquiries, directing technical enquiries to the appropriate Agency officers, preparing and distributing general and technical information material. The Division also prepared the Agency's annual report to Parliament and was responsible for providing the editorial and production services required for Agency publications.

REVIEW PROCESS

As soon as a notice outlining an investment proposal was received by the Foreign Investment Review Agency, it was examined by the Compliance Branch to determine whether or not the proposal was reviewable and whether the notice contained all of the information prescribed by the Foreign Investment Review Regulations. If the proposal was judged reviewable and complete, it was passed on to the Assessment Bureau for evaluation based on the benefit factors outlined in the Act. Frequently, during this stage, information additional to that contained in the notice was sought and obtained through contacts with the applicant and consultations with appropriate federal departments. The proposal was also circulated to the province or provinces that would be significantly affected by the investment for their views and comments. Once all the necessary information had been assembled the case was then referred to the Minister, together with an assessment by the Agency of the perceived effects of the investment by reference to the factors prescribed in subsection 2(2) of the Act. If the Minister concluded that the investment was likely to result in significant benefit to Canada he must make a recommendation to the Governor in Council that the investment be allowed. If not, the applicant is informed accordingly. The applicant then has the opportunity to make further representations. When those representations are completed the case is referred to the Minister a second time for a final decision as to what his recomendation will be.

# REVIEW PROCESS



*If, within 60 days of receipt by the Agency of a complete notice, the Minister is unable, on the basis of the information before him, to recommend allowance, the applicant is so advised and may make further representations.
